

Keiran Montagu

Founder of Athlete Tracker

Keiran is the founder and owner of Montagu Academy, and, consequently, Athlete Tracker. He has a significant background in sport, both as a player and coach. In tennis, he represented Gloucestershire, the West Midlands and Great Britain Catholic Schools as a junior and went on to captain the University of Liverpool Men's tennis team. During his time in Liverpool, he achieved a degree in History and reached the last 16 of the British Students Championships on two occasions. He holds a CCA Performance Coach (UKCC Level 4) qualification in tennis and has, over the years, gained further qualifications in a variety of sports.

Prior to the formation of Montagu Academy, Keiran was the Director of Extended School at St. Peter's RC High School in Gloucester and established many successful partnerships in the community. The creation of St Peter's Tennis Academy also occurred under Keiran's leadership and culminated in placing as the 5th ranked school in the UK and the top Comprehensive. He has also coached tennis to junior International level.

In 2013, Keiran founded Primary School sport under the banner of St. Peter's and over the first two years, the programme saw coaches delivering sport in 15 primary schools across Gloucestershire. It was the growth and development of this programme that would eventually create the blueprint for Montagu Academy itself.

Since its inception, Montagu Academy has gained a reputation for delivering high level PE as well as INSET training for teachers. The company is always innovating. Part of this progression has seen the creation of a curriculum - 'Transferable Primary PE'. More recently, there has been the development of 'Athlete Tracker' - for measuring DEFINITE progress in PE and measuring the IMPACT of Sport Premium funding.
